Full Stack Engineer

Full Stack Engineer with hands-on experience building production applications using Next.js, NestJS, PostgreSQL, and MongoDB. Currently leading a full digital transformation project at MOG Group, migrating legacy manual processes into a modern ERP. Experienced in data modeling, system architecture, and translating business workflows into scalable software.

PROFESSIONAL EXPERIENCE

MOG Group - Full Stack Engineer (Full-time)

Jun 2026 - Present | On-site

- Leading **design and development of a custom ERP system** from scratch, working closely with business operations to translate existing workflows into system requirements and deliver functionality incrementally.
- Designing and implementing 7 core ERP modules covering purchasing, inventory, production, sales, accounting, HR and other business operations using **Next.js, NestJS, Drizzle ORM, and PostgreSQL**.
- Migrating and restructuring historical business data from the legacy system into the new database architecture, ensuring data integrity and consistency throughout the transition.

Gen Z Wellness App - Full Stack Engineer (Contract)

Dec 2025 - Jun 2026 | Remote

- Migrated core database **from MongoDB to PostgreSQL** using the **Repository Pattern**, ensuring zero data loss.
- Migrated a legacy **React codebase to Next.js across 50+ pages**, improving performance, SEO, and scalability.
- Improved page load performance by ~45%** using Incremental Static Regeneration (**ISR**) and image optimization.
- Built a Google Calendar-integrated **session booking system** linking users with 50+ verified care providers.
- Built a **multi-vendor marketplace** expanding operations across Egypt, Canada, and the US with **Stripe payments**.
- Built automated **CI/CD pipelines** for both **Staging and Production** environments using GitHub Actions.
- Migrated the app from Azure to a VPS**, reducing costs and improving server performance and security.

Leopard Stores - Full Stack Engineer (Contract)

Jul 2024 - Dec 2025 | Remote

- Built core the modules of **the e-commerce platform**, covering the product catalogs, cart, checkout, and order management for **5,000+ products and variants across multiple warehouses**.
- Integrated **Paymob payment gateway** for secure online transactions.
- Developed key features of the **integrated accounting system** and reporting modules for inventory and sales.
- Developed an internal staff permission system with **customizable permission system** (beyond standard RBAC).
- Designed a modular **internationalized architecture (i18n)** supporting Arabic and English.

TECHNICAL SKILLS

- | | |
|--|--|
| - Languages: TypeScript, JavaScript | - Payment Integrations: Stripe, Paymob |
| - Frontend: React, Next.js, Tailwind, Shadcn | - API & Protocols: RESTful APIs, WebSocket, GraphQL |
| - Backend: Node.js, Express.js, NestJS | - Practices: Agile/Scrum, System Design, Data Modeling, |
| - Databases: PostgreSQL, MongoDB, Drizzle, Mongoose | Modular Architecture, Unit Testing with Jest |
| - DevOps & Cloud: Linux, Nginx, Docker, GitHub Actions, CI/CD, Vercel | |

EDUCATION | CREDENTIALS

- Bachelor of Computer Science**, Helwan University, Cairo, Egypt (GPA: 3.2 / 4.0) Oct 2020 - Jun 2024
 - Graduation Project: **Pro Sales CRM** • A+
