Full Stack Engineer

Full Stack Engineer with 2+ years of experience building scalable ERP systems and user-centric platforms. Specialized in NestJS, Next.js, and designing scalable data architectures using PostgreSQL and MongoDB. Experienced in complex troubleshooting and delivering high-performance applications with a focus on modern UI. Demonstrated experience migrating legacy systems and implementing secure role-based access controls.

WORK HISTORY

Gen Z | Wellness Platform 🔗 *Feb 2026 - Present*

- **Migrated a legacy React codebase to Next.js across 50+ pages,** improving performance, SEO, and scalability
- **Reduced redundant API calls in admin pages by ~65%** through consolidating endpoints into **optimized requests**
- Built a **session booking system** connecting **users with 50+ verified care providers**
- Implemented secure authentication with Google OAuth and role-based access control (RBAC)
- Designed a modular, **internationalized architecture (i18n)** supporting Arabic and English
- Built **real-time chat and community system using WebSockets** supporting live interactions across users.

Technologies: MongoDB, Mongoose, NestJS, Next.js, Tailwind, WebSockets

Leopard | ERP System & Online Store 🔗 *Jul 2024 - Jan 2026*

- Migrated backend **from Express.js to NestJS**, refactoring architecture into a modular, scalable structure
- Migrated a disorganized legacy dataset **from MongoDB to PostgreSQL**, redesigning schema, optimizing queries and indexing strategy, **improving overall system performance by ~35% and reporting speed by ~50%**, while ensuring data integrity and consistency during migration.
- **Improved page load performance by ~45%** using Incremental Static Regeneration (**ISR**) and image optimization
- Built an ERP and eCommerce store **managing 1,000+ products and 4,500+ variants across multiple warehouses**
- Implemented secure authentication using short-lived access token and refresh token rotation and Google OAuth
- Served internal staff with **customizable permission system** (beyond standard RBAC) and 2,500+ public users
- Designed full **i18n support with Arabic/English** multilingual experience
- Integrated **Paymob payment gateway** for secure online transactions
- Implemented new **reporting and analytics modules** for inventory, sales, and order tracking
- Managed the full **order lifecycle**: product catalog, cart, checkout, and order management
- Built and maintained **CI/CD pipelines using GitHub Actions for automated builds** and production releases

Technologies: PostgreSQL, Drizzle ORM, NestJS, Next.js, Tailwind

Pro Sales | CRM 🔗 *Dec 2023 - Jun 2024*

- Built a fully customizable CRM platform focused on sales workflows and client engagement
- Developed pure, reusable React and Tailwind component library for maintainability and scalability
- Implemented secure authentication and granular role-based access control
- Built interactive data visualizations using Chart.js

Technologies: React, Tailwind, Chart.js

ADDITIONAL PROJECTS

Military Hospital Systems ***Apr 2025 - Jan 2026***

- Deployed internally for 20 supervisors managing daily operations on rotating shifts
- Tracked and recorded ~250+ hospital staff members daily across personnel and attendance modules
- Logged ~500+ daily patient and companion entries through a structured admission system
- Built responsive, reusable interfaces with React and Tailwind CSS

Technologies: MongoDB, Mongoose, Express.js, React, Tailwind

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Node.js, Express.js, NestJS, React, Next.js, Tailwind.
- **Databases & ORMs:** PostgreSQL, MongoDB, Drizzle ORM, Mongoose.
- **DevOps & Cloud:** Linux, Nginx, GitHub Actions (CI/CD), Docker, Vercel.
- **API & Integrations**: RESTful APIs, WebSocket, JWT Auth, OAuth.
- **Architecture & Practices**: System Design, Data Modeling, Modular Architecture.
- **Payment Integrations:** Stripe, Paymob.

EDUCATION | CREDENTIALS

- **Bachelor of Computer Science**, Helwan University, Cairo, Egypt (GPA: 3.2 / 4.0)
