SUMMARY

Full Stack Engineer with hands-on experience building scalable ERP systems and user-centric platforms. Specialized in NestJS, Next.js, and designing scalable data architectures using PostgreSQL and MongoDB. Experienced in complex troubleshooting and delivering high-performance applications with a focus on modern UI. Demonstrated experience migrating legacy systems and implementing secure role-based access controls.

PROFESSIONAL EXPERIENCE

Gen Z Wellness App 🌐

Dec 2025 – Present | Remote

Full Stack Engineer (Contract)

- Migrated core database **from MongoDB to PostgreSQL**, redesigning schemas and improving consistency
- **Migrated a legacy React codebase to Next.js across 50+ pages**, improving performance, SEO, and scalability
- **Reduced redundant API calls in admin pages by ~65%** by consolidating endpoints into **optimized requests**
- Built a **session booking system** connecting **users with 50+ verified care providers**
- Implemented secure authentication with Google OAuth and role-based access control (RBAC)
- Designed a modular **internationalized architecture (i18n)** supporting Arabic and English
- Built **real-time chat and community system using WebSockets** supporting live interactions across users
- Configured a Linux **VPS (Ubuntu)** environment for hosting, optimizing server performance and security
- Engineered automated **CI/CD pipelines** for both **Staging and Production** environments using GitHub Actions

Leopard ERP System & Online Store 🌐

Jul 2024 – Dec 2025 | Remote

Full Stack Engineer (Freelance)

- Migrated backend **from Express.js to NestJS**, refactoring architecture into a modular, scalable structure
- Migrated a disorganized legacy dataset **from MongoDB to PostgreSQL**, redesigning schema, optimizing queries and indexing strategy, **improving overall system performance and reporting speed by ~35%**, while ensuring data integrity and consistency during migration
- **Improved page load performance by ~45%** using Incremental Static Regeneration (ISR) and image optimization
- Built an ERP and eCommerce store **managing 1,000+ products & 4,500+ variants across multiple warehouses**
- Built a barcode label printing system for products and invoices, generating scannable labels
- Implemented secure authentication using short-lived access token and refresh token rotation and Google OAuth
- Served internal staff with **customizable permission system** (beyond standard RBAC) and 2,500+ public users
- Designed full **i18n support with Arabic and English** multilingual experience
- Integrated **Paymob payment gateway** for secure online transactions
- Implemented new **reporting and analytics modules** for inventory, sales, and order tracking
- Managed the full **order lifecycle**: product catalog, cart, checkout, and order management
- Built and maintained **CI/CD pipelines using GitHub Actions for automated builds** and production releases

ADDITIONAL EXPERIENCE

Zagazig Military Hospital

Built and maintained an internal MERN stack system during my military service, used by supervisors to manage rotating-shift operations, track 250+ hospital staff records, and handle 500+ daily patient and companion entries through a structured admission process.

TECHNICAL SKILLS

Languages — TypeScript, JavaScript

Frontend Development — React, Next.js, Tailwind CSS, Shadcn/ui

Backend Development — Node.js, Express.js, NestJS

Databases & ORMs — PostgreSQL, MongoDB, Drizzle ORM, Mongoose

DevOps & Cloud — Linux (Ubuntu), Nginx, Docker, GitHub Actions (CI/CD), Vercel

APIs — RESTful APIs, WebSocket, GraphQL

Testing — Unit Testing (Jest), Integration Testing, API Testing (Postman, Apidog, Swagger)

Engineering Practices — Agile/Scrum, System Design, Data Modeling, Modular Architecture, Clean Code

Payment Integrations — Stripe, Paymob

Version Control — Git, GitHub

EDUCATION

Bachelor of Computer Science

Jun 2020 – Jun 2024 | Cairo, Egypt

Helwan University

- GPA 3.2 / 4.0
- Graduation Project: Pro Sales CRM • **A+**
 - Built a fully customizable CRM platform focused on sales workflows and client engagement
 - Developed pure, reusable React and Tailwind component library for maintainability and scalability
 - Implemented secure authentication and granular role-based access control
 - Built interactive data visualizations using Chart.js
